DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 8, 9, 11, 14, and 16 are, drawn to load balancing of jobs, classified in class 718, subclass 105.
 - II. Claims 6, 7, 10, 12, 13, and 15 are, drawn to scheduling jobs for execution, classified in class 718, subclass 102.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as determining whether or not to move a first job from a first processor to a different processor and assigning a second job on the plurality of processors. Group II deals with a system for performing job scheduling having a static scheduling device and a dynamic scheduling device. Group II does not require any determination as disclosed in Group I and Group I does not require the consideration of different scheduling devices as disclosed in Group II. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different search, and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

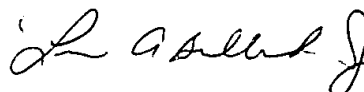

4. A telephone call was made to Patrick Burns on March 3, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
